## PROJECTS

2024 – CURRENT
**Development of a web application**

A web system for managing printing services, focusing on screen printing, graphic design and others. The system was developed with Laravel and PHP, with features to manage products, place orders, track status and integrate with logistics services such as DHL and Correio 24.

2023 – 2023
**Development of a web application**

Developed a web app using the TMDB API to let users search, explore, and save movies and TV series, offering real-time results and detailed info on each title.

2022 – 2022
**Car Sales Analysis**

Built a system with SQL and Power BI to analyze car sales and customer data, helping improve inventory, pricing, and sales forecasting.
